TO WHOM IT MAY CONCERN

This is to commend Mr.Aejaz Mirza who has designed, manufactured and supervised the installation of Hydraulic Lifter in our flat at above address.

Our flat is a duplex pent house with 18 steps leading from lower to upper floor. Because of health reasons my wife and I were finding it difficult to climb these steps. We were informed about the hydraulic lifter and decided to go for it. The problem we faced was that no one would believe that that this was a light structure and will not adversely affect the building structure. The Estate Manager has very strict guidelines to follow to avoid any damage to structure and inconvenience to the fellow residents.

Mr. Mirza professionally explained the Management Committee and structural advisor engineers to their satisfaction and the project was approved.

The hydraulic lifter was installed in a matter of 3 days. It is both effective and aesthetically appealing. The material used and the service provided is entirely to our satisfaction.

I Have no hesitation to recommend Mr. Mirza 's services and the hydraulic lifter.

(Kirpal Singh)
